

KIRA BOYER

6187 Sasha Crossroad, San Francisco, CA+1 (555) 400 8551

WORK EXPERIENCE

SENIOR CLOUD DEVOPS ENGINEER

12/2017 - PRESENT

Philadelphia, PA

- Work on building solutions to automate common workflows such as Provisioning of servers, network, storage etc
- Build self-service for commonly requested tasks related to servers, storage and network
- Build automation for common operational tasks such as equipment upgrades, pause and resume of updates etc
- Assist the team in resolving day to day tasks such as configuration, tuning, responding to alerts etc
- Perform routine system administration activities such as adding/modifying/removing user access, installing upgrades and patches, maintaining backups and restores, running scheduled processes, etc
- Perform routing network changes under supervision with senior team members
- Strong ability to interact with all levels of the organization
- Taking ownership of assigned issues/enhancements/features and helping to define a plan and related coordination activities to provide an end to end solution
- Proactively anticipates problems before they occur; identifies possible causes; works with team to identify solutions; selects and implements most appropriate solution

CLOUD DEVOPS ENGINEER

12/2012 - 06/2017

Boston, MA

- Proactively raising issues to Engineering Lead
- Produce documents which contain clear, precise descriptive language
- Provide required training and support to other peer teams for newly designed and developed functionality
- Utilize approved tools, adopt key performance indicators (KPIs), increase technology component reuse, and consolidate platforms, environments and products with the goal of reducing overall IT costs
- Proven solution design skillsBeing able to script and automate a solution end-to-end (infrastructure, middleware and application layers)
- Customer focused with ability to identify and understand customer's needs
- Creative problem solving and analysis skills with an ability to identify develop and implement solutions to gaps to meet the needs of the business
- CI/CD Tools (Git, Jenkins, etc ...) - 3 years

IT CLOUD DEVOPS ENGINEER MULTIPLE LOCATIONS

08/2007 - 07/2012

Houston, TX

- Configuration Management and Automation tools (Puppet, Ansible or SaltStack) - 5 years
- Scripting (Bash, PowerShell, Python) and Infrastructure development experience - 10 years
- Software development methodologies - 5 years
- VMWare vRealize Automation Suite 7.x - 3 years
- VMWare vSphere Hypervisor - 5 years
- Microsoft Windows administration - 10 years
- Redhat Linux administration - 10 years
- Networking, Storage and Security concepts, technologies and operational experience - 10 years

EDUCATION

WAYNESBURG UNIVERSITY

2003 - 2007

PROFESSIONAL SKILLS

- Proven strong customer focus and excellent communication skills with a successful track record of collaborating in cross-functional teams
- Excellent organizational, time management, prioritization and multi-tasking skills
- Strong active listening, conflict resolution, negotiation, consensus-building skills and passionate about learning new technologies
- Strong Object-Oriented Programming Skills. Good understanding of data structures and algorithms
- Positive attitude, attention to detail, a team player, good problem-solving skills, and strong work ethic
- Demonstrated scripting skills in one or more of Shell, Python, Perl, and Ruby
- Knowledge of Hybrid Cloud environment and strong scripting skills

CREATE A CLOUD DEVOPS ENGINEER RESUME

How to write Cloud Devops Engineer Resume

Cloud Devops Engineer role is responsible for scripting, business, coding, automation, python, leadership, analytical, organization, ruby, technology. To write great resume for cloud devops engineer job, your resume must include:

- Your contact information
- Work experience
- Education
- Skill listing

Contact Information For Cloud Devops Engineer Resume

The section contact information is important in your cloud devops engineer resume. The recruiter has to be able to contact you ASAP if they like to offer you the job. This is why you need to provide your:

- First and last name
- Email
- Telephone number

Work Experience in Your Cloud Devops Engineer Resume

The section work experience is an essential part of your cloud devops engineer resume. It's the one thing the recruiter really cares about and pays the most attention to. This section, however, is not just a list of your previous cloud devops engineer responsibilities. It's meant to present you as a wholesome candidate by showcasing your relevant accomplishments and should be tailored specifically to the particular cloud devops engineer position you're applying to. The work experience section should be the detailed summary of your latest 3 or 4 positions.

Representative Cloud Devops Engineer resume experience can include:

- Strong code/scripting skills for IaaS automation
- Excellent written and verbal communication skills with ability to articulate complex topics to non-technical audiences
- Strong interpersonal skills and desire to help people
- Coding skills in Python, PHP, or another interpreted language like Perl or Ruby
- Scripting skills in Python, Perl, Bash, Shell or another common language
- Looking for a DevOps Engineer with strong experience with Amazon Web Services automation

Education on a Cloud Devops Engineer Resume

Make sure to make education a priority on your cloud devops engineer resume. If you've been working for a few years and have a few solid positions to show, put your education after your cloud devops engineer experience. For example, if you have a Ph.D in Neuroscience and a Master's in the same sphere, just list your Ph.D. Besides the doctorate, Master's degrees go next, followed by Bachelor's and finally, Associate's degree.

Additional details to include:

- School you graduated from
- Major/ minor
- Year of graduation
- Location of school

These are the four additional pieces of information you should mention when listing your education on your resume.

Professional Skills in Cloud Devops Engineer Resume

When listing skills on your cloud devops engineer resume, remember always to be honest about your level of ability. Include the Skills section after experience.

Present the most important skills in your resume, there's a list of typical cloud devops engineer skills:

- Good Learning skills and excellent attitude
- Strong analytical and practical problem solving skills (not on paper only)
- Strong code/scripting skills for IaaS automation
- Demonstrated coding skills in Python and Bash
- Proven ability to collaborate effectively across disciplines, product
- Detail-oriented, with excellent analytical, technical and problem-solving skills

List of Typical Experience For a Cloud Devops Engineer Resume

1 Experience For Senior Cloud Devops Engineer Resume

Good understanding & experience of Networking, Firewall, Security hardening, storage and software package management in Unix Environment

Experience working in cloud-based environments, including the design and set up of cost-effective systems in these environments

Desired Knowledge, Skills, Abilities and Competencies: FedRAMP, NIST and FISMA compliance, ATO and security compliances

Experience as an established member of DevOps or Build & Release teams, with proven track record of successfully delivering services

Solid experience with Cloud CI, Docker, Kubernetes and Containerization is required

2 Experience For Cloud / Devops Engineer Resume

Proven experience with web application management including, but not limited to: HTML5, JavaScript, CSS, Apache, NGINX, Ruby, and Python

Experience coding and scripting, including Python and Powershell

Experience in building CI/CD pipeline automation in tools like Jenkins/Cloudbees with scripting languages such as Groovy, Ruby, or Python

Demonstrable hands-on experience as an Infrastructure Engineer installing and configuring server and/or network hardware and software

Solid development and scripting background (bash, ruby, python, etc.)

Experience doing continuous integration and deployment with tools such as Jenkins

Hands on experience working in a structured environment where process and documentation were a part of daily life

Solid understanding of public clouds (i.e. GCP, AWS, AZ)

Advanced-level Operations experience with compute, networking, and storage

3 Experience For IT Cloud Devops Engineer Multiple Locations Resume

Experience with monitoring solutions such as Nagios, DataDog, AppDynamics, NewRelic, ThousandEyes

Experience with Logging technologies such as ELK, Splunk

Experience with monitoring solutions such as NewRelic, Nagios/Icinga

Experience working with IaaS/Infrastructure as Code tools, such as CloudFormation, Terraform, etc

Experience working with IaaS/Infrastructure as Code tools, such as CloudFormations, Terraform, etc

Experience in software development and DevOps using agile methods

4 Experience For Experienced / Senior Cloud Devops Engineer Resume

In depth, practical experience with Cloud methodologies (IaaS, PaaS, SaaS), automation, orchestration, trends and industry-leading cloud vendor offerings
Practical experience working in DevOps team/organizations with applied Agile development practices
Hands on experience with automated tooling such as Chef and Test Kitchen
Experience with creating Docker Containers' , and container orchestrations eco-system such as Kubernetes, Mesos
Experience working with cloud automation tools

5 Experience For Arity Cloud Devops Engineer Resume

Experience in building CI/CD pipeline automation - Jenkins etc
Hands on experience with automated tooling such as Chef
Solid understanding of software development, from design and architecture through verification, release, and customer support
Experience with infrastructure automation using Terraform, Cloud Formation Templates and/or Azure Resource Manager Templates
Experience with configuration management using either Puppet, Chef, Ansible or an equivalent
Software programming experience in Java, C/C++, Python, Ruby, JavaScript, GO
Solid understanding of public clouds (i.e. AliCloud, GCP, AWS, AZ)
Software programming experience in one of Python, Java, C/C++, GO
Extensive experience in development of automation tools with popular languages such as Java, node.JS, Python, Unix shells scripting, etc.,

6 Experience For Public Cloud Devops Engineer Resume

Work collaboratively with product and cloud engineering teams to build, deploy and operate our systems
Experience of working in large brown and green field programs
Experience working with Cloud services (AWS, Azure, Google Cloud, etc) with demonstrable portfolio
Experience with monitoring large cloud systems
Experience securing infrastructure (AWS permissions, S3 architecture)
Experience with cloud operations tooling (Salt Cloud, Terraform, CloudFormation, etc.) and custom orchestration
Experience deploying applications to heterogeneous environments: cloud, on-prem (private cloud), and end-user (developer, car)
Experience in working with Continuous Integration and deployment solutions deployment e.g Jenkins

7 Experience For Senior AWS Cloud Devops Engineer Resume

Good understanding of cloud-based security best practices

Experience in the following

Automation Experience with Build/deployment, Software Configuration/Continuous

Integration/Continuous Delivery/Release Engineering related tasks in AWS

Strong knowledge of AWS components including but not limited to EC2, ECS, ECR, ELB, Beanstalk, S3, ALB, API Gateway, Lambda, IAM, VPC, Security Groups, etc

Excellent at troubleshooting complex systems

Experience in programming with C++/Java/Python/GoLang

Solid technical background using complex data structures and algorithms

Hands-on experience on any one programming language preferably python, ruby or Golang

Experience with Docker, Microservices and container deployment and service orchestration using Kubernetes, nomad or Azure container service

8 Experience For Principal Cloud Devops Engineer Resume

Experience working in highly distributed team

Very strong understanding of cloud technologies – has deployed more than one solution on the cloud

Experience delivering cloud based, multi-tenant secure solutions

Experience using source code control in GIT

Operations engineering experience in SaaS Cloud or Hybrid Cloud Environments

Experience with Linux operating systems

9 Experience For Senior Cloud Devops Engineer Monitoring Specialist Resume

Experience with containers and supporting orchestration systems, such as Docker & Kubernetes

Experience implementing cloud solutions

Previous experience migrating application teams from data center to cloud

Strong understanding of Docker and/or other containerization solutions

Experience in a production data-intensive computing role

Strong Networking Background with Industry Standard Certification

Demonstrable knowledge of TCP/IP, HTTP, distributed systems, and experience supporting multi-tier web application architectures in a

Experience in production service trouble-shooting that spans applications, systems and network

10 Experience For Cloud Devops Engineer Monitoring Specialist Resume

Experience programming in Java, C#, JavaScript, and/or TypeScript

Experience with Linux administration and infrastructure management
Git and GitFlow, Source code strategy, Continuous integration and delivery experience
Experience with IIS and Tomcat
Experience in Linux Scripting as Developer or IT resource

List of Typical Skills For a Cloud Devops Engineer Resume

1 Skills For Senior Cloud Devops Engineer Resume

Strong experience in infrastructure development including automation and scripting
Strong experience in building and maintaining an ELK Stack
Strong Scripting experience, could be perl, korn shell, or any programming language
Strong experience with structuring/maintaining Role-Based Access Control policies
Strong experience with configuring and managing federated identity solutions
Excellent communication, sense of balance in making priority

2 Skills For Cloud / Devops Engineer Resume

Experience with good understanding of Enterprise business practices
Strong network knowledge, and experiences on network design, implementation and troubleshooting
Proven experience with web application management including
Experience in a Telecom Environment or at least 2 years work experience in a relevant field (computer programming, etc.)
Strong experience working in cloud environments – AWS, Azure
Powershell -- scripting/automation skills
Leadership skills as well as seeks feedback

3 Skills For IT Cloud Devops Engineer Multiple Locations Resume

Select, adapt, and effectively use a variety of programming method
Demonstrated experience in Infrastructure as code such as Cloud Formation, Terraform, Azure Resource Templates, etc
Strong experience with Kafka
Strong experience in Design/Implementation containers/applications in scalable HA/DR multi-tier cloud environments
Communicates clearly and effectively evaluates information to make decisions
Good experience with SQL and databases

4 Skills For Experienced / Senior Cloud Devops Engineer Resume

Communicate effectively with end-users, business owners, developers, managers and site reliability engineers

Work closely with our engineers to recommend and design solutions that effectively reflect our business needs, security, and service level requirements

Prior experience in administration of database systems

Prior experience in Configuration Management such as Chef, Puppet or others

At least years of experience in software engineering / operations projects with at least one year of experience in cloud computing

Being a part of a strong continuous learning culture

Scripting experience in at least one of the following; Ruby, Python, Bash

5 Skills For Arity Cloud Devops Engineer Resume

Programming and scripting experience, Process Automation

Programming experience using Python and/or Golang

Scripting experience (Bash, Python, Ruby, PHP, etc)

Providing technical leadership, deep technology expertise and architecture experience

Practical experience designing, building, and automating solutions utilizing AWS services

6 Skills For Public Cloud Devops Engineer Resume

Experience with establishing, deploying, administering, and monitoring application environments in an AWS or AWS GovCloud environment

Experience provisioning, operating, and managing AWS environments

Experience with cloud-based provisioning, monitoring, troubleshooting, and related DevOps technologies

Thorough understanding of and hands on experience with Infrastructure Engineering technologies (firewalls, load balancers, storage, monitoring, security etc.)

Experience in operations management tools. Alerting & Monitoring, Provisioning & Deployment, Configuration Management and Source Control, etc

Experience creating, implementing, and maintaining automated deployment pipelines

Experience in monitoring and setting up alerting for Cloud components

7 Skills For Senior AWS Cloud Devops Engineer Resume

Experience with various scripting and programming languages such as Perl, Python, Shell

Scripting, Ruby, JSON, Java, or Jacl

Experienced architect with years of hands-on planning, architecting, and engineering enterprise class systems and services
Experience in exposing and consuming REST, gRPC services
Experience with alert and trend monitoring software, like the following: Net-SNMP, Nagios, Cacti, and Graphite
Experience with Linux (Ubuntu, RedHat, CentOS) administration including networking (TCP/IP, DNS, SMTP, HTTP/HTTPS etc. protocols)
Extensive experience with scripting and programming such as Python, Go, Ruby
Experience building and supporting large scale, business critical Network systems
Hands on experience deploying and maintaining operational stacks on AWS

8 Skills For Principal Cloud Devops Engineer Resume

Experience in automating manual processes using Python, Ruby, Unix Shell (bash, ksh), perl, etc
Experience maintaining and developing an enterprise-level JEE website in various technical capacities
Experience managing enterprise systems in Amazon Web Services, specifically utilizing Opsworks stacks, RDS database management, S3, and Cloudfront
Experience supporting applications and services with jboss, tomcat, and possible spring boot platforms on a linux platform
Experience with scripting in one or more programming languages
Experience with cloud computing technologies (GCP/AWS), including tools such as Terraform
Experience in IT Operations / System Engineering of highly-available applications, interacting with AWS and/or MS Azure back end
3+ yrs of experience with administering/tuning relational (e.g. MySQL, PostgreSQL) and No-SQL databases (e.g. MongoDB, Cassandra, HBase)

9 Skills For Senior Cloud Devops Engineer Monitoring Specialist Resume

Hands-on experience in building and implementing reliable infrastructure components to deliver highly scalable services on MS Azure
Experience in automating deployment, administration and monitoring of large-scale cloud environments
Experience of integration with logging/monitoring tools
QA and testing experience of your code and the entire platform. We test everything
Experience supporting the following Datastores/Databases: MS-SQL server, MySQL, MongoDB, PostgreSQL, Cassandra
Experience with automation using scripting and tools such as Puppet, Chef
Experience as a system administrator or DevOps design and creating scalable applications from R&D, to staging to production
Experience in scripting and programming knowledge (Python or Ruby)
Experience in designing and implementing scalable cloud-based solution architectures for PaaS, IaaS or SaaS

10 Skills For Cloud Devops Engineer Monitoring Specialist Resume

Strong understanding of cloud technology (especially AWS) with a broad understanding of infrastructure and AWS Ecosystem technologies

Experience with managing and integrating Identity Management tools such as Microsoft Active Directory

Experience in architecting and implementing cloud based solutions with robust Business Continuity and Disaster Recover requirements

Experience in IT platform, storage, networking, and virtualization engineering

Demonstrate a pattern of continuous learning by researching new technologies and software products

Significant experience in programming and shell scripting (e.g., Python, bash)

Experience with writing unit testing

Strong background in object-oriented programming, Software design principals, SaaS enterprise SW development, test-driven development, and refactoring

List of Typical Responsibilities For a Cloud Devops Engineer Resume

1 Responsibilities For Senior Cloud Devops Engineer Resume

Knowledge of and experience implementing dynamic IP routing protocols (BGP, OSPF, EIGRP, MPLS)

Strong knowledge of operating systems

Strong understanding of SDLC in within Agile environments - desirable

Experience of supporting production applications on AWS or other similar cloud technologies - desirable

Experience building CI/CD pipeline for distributed systems with a focus on APIs and IoT concepts

2 Responsibilities For Cloud / Devops Engineer Resume

Recent experience working with PaaS/IaaS frameworks (Microsoft Azure, Amazon Web Services)

Demonstrated proficiency in Network Administration? DNS/DHCP, Load Balancing (F5 Networks, AWS ELB), Firewalls (Cisco Systems), IDS/IPS, VPN)

Knowledge and experience with object orientated programming languages such as Java, C#, C/C++

Strong working knowledge Azure or AWS

DevOps experience including implementation of configuration management software (Ansible, Chef, Puppet, etc.)

Experience in automating code deployment in Microsoft Azure with other cloud providers such as Amazon Web Services, Google Cloud, VMWare and OpenStack

Good knowledge of application development using Agile, and DevOps best practices

3 Responsibilities For IT Cloud Devops Engineer Multiple Locations Resume

Experience with Powershell and/or Ruby scripting

Significant experience with Continuous Integration and building test automation frameworks

Experience with various scripting (Node, Python, Ruby, PowerShell and/or Unix shell) tools

Over 3 years of architectural experience in a DevOps or Cloud Infrastructure Engineering Role

Software application and Infrastructure monitoring solutions development and deployment experience

Experience helping clients define technical and non-functional requirements

Comprehensive Azure PaaS experience including the design, deployment and support of custom-developed, enterprise solutions

Build and deployment automation (Continuous Integration/Delivery) experience using industry-standard platforms

4 Responsibilities For Experienced / Senior Cloud Devops Engineer Resume

2+ yrs of DevOps experience including implementation of configuration management software (Ansible, Chef, Puppet, etc.)

1+ yrs of working experience with container technologies (Docker/Warden/Kubernetes)

Experience of using appropriate languages and tools for automated infrastructure delivery

Experience of optimising cloud deployments for speed, scalability and cost

Python, Ruby, or similar programming experience

Proven ability to respond to critical issues on a 24/7/365 basis and to own problems from beginning to end

Deep AWS architecture and development experience with a variety of applications use-cases

Experience with virtualization (VMware or KVM or Oracle VM)

Experience with Puppet or Chef or Ansible

5 Responsibilities For Arity Cloud Devops Engineer Resume

Experience with Version Control (GIT or SVN)

Experience with Jenkins or TeamCity

Demonstrated knowledge of software development and IT operations best practices

Related devops experience

Experience with CI/CD and related toolings as a user

Experience with RDBMS and/or NoSQL

Advanced-level experience with Linux administration

Prioritize and complete assigned tasks in timely manner

Experience in the design & implementation of distributed applications

6 Responsibilities For Public Cloud Devops Engineer Resume

Database (SQL and NoSQL) and data services experience in Azure (Azure, SQL, Document DB, HD Insight, Data backup)

Experience with Azure PowerShell, VSTS, ELK, GIT

Leverage experience to evaluate new offerings from AWS to advise and drive adoption to internal clients

Strong hands-on mentality and flexibility to perform whatever task that needs to be done in the software development cycle

Significant experience with Linux system administration

7 Responsibilities For Senior AWS Cloud Devops Engineer Resume

Experience with Amazon Web Services (EC2, VPC, ELB, S3, CloudFormation, etc.)

Related devops experience

Reviewing and analyzing legacy applications, refactoring the applications to utilize cloud-native services, and migrating them to the cloud

Understanding of security including OS hardening, firewalls, iptables, and working with Infosec

Understanding of technologies such as virtualization and global infrastructure, load balancing, networking, security and Operations

Assisting Development and product operations engineers with troubleshooting infrastructure issues

Automating software build, deployment and server configuration management using tools such as Jenkins, Git, Python, Terraform, CloudFormation etc

Hardening configuration and environments following best practices and known vulnerabilities

8 Responsibilities For Principal Cloud Devops Engineer Resume

Designing and implementing solutions and services in the cloud

Hosting and operations management and monitoring

Supporting & operating our deployment infrastructure

Building deployment pipelines and extending our deployment platform

Supporting product teams with customer facing products

Providing technical and subject matter expertise for establishing Continuous Integration and Continuous Delivery frameworks

Developing automation tools for deployment and testing of enterprise cloud platforms

9 Responsibilities For Senior Cloud Devops Engineer Monitoring Specialist Resume

Providing thought leadership in Cloud technology including virtualisation, hypervisors, storage and security

Leading the solution analysis, solution design (and where required) leading local and offshore technical teams

Working in a friendly atmosphere in an international environment with flexible working hours - in a very hi-tech new office with relax and game rooms!

Joining a fast growing team that designs, develops, troubleshoots and debugs software programs for databases, applications, tools, networks etc

Powering our future service deployments

10 Responsibilities For Cloud Devops Engineer Monitoring Specialist Resume

Creating new automation and orchestration utilities to increase HA of internal services

Willing to participate in on-call rotational assignments

Dealing with security patches and issues at the Hardware, OS, and OpenStack layer

Working knowledge of VM's and virtualization

Programming proficiency with one or more SW development languages (ex. java, python, node.js, go, angular)

Seeking someone with AWS, devops, automation and linux administration exp

Working with a variety of technologies in a company which follows the newest trends in the IT market
